

## FRSK-RHT RETROFIT SHIELDING KIT

2x2, 2x4 Recessed Direct / Indirect

FRSK-RHT 2x4

### ELEGANT DESIGN

The FRSK-RHT incorporates a radial high transmission optic between sloping acrylic panels providing the look and feel of a deep luminaire — subtle soft indirect elements, interest and depth across the ceiling plane — with a kit that consumes minimal space and material.

### EFFICIENT SOLUTION

The contoured side panels of the unit are high transmission acrylic that provide a low- brightness glow, with the majority of the light controlled through the center optical element.

### APPLICATION

For use with most recessed lay-in fixtures in standard 15/16" grid ceiling systems. Ideal for single lamp systems.

Recessed Direct / Indirect

### SPECIFICATIONS

#### Door Frame

Features positive latching mechanism for easy re-lamping.

#### Direct Optical Component

High reflectance optical engine delivers main beam focus through the revolutionary high transmission diffusing panel. With 93% transmission and 89% haze, the result is extraordinary control and efficiency. The radial curve reduces interior reflections and improves transmission. The radial HT geometry is particularly suited for single lamp conversions.

#### Diffuser Surround

(2) Sloping high transmission acrylic diffuser panels manage contrast and generate soft, even, higher angle luminance.

#### Reflector

Multi-radii high reflectance white reflector distributes light through both optical elements.

#### Luminaire Type

Fits most standard lay-in lensed or parabolic housings 2X2' and 2X4'.

#### Lamps

1- or 2-lamp T8 or T5 fluorescent wiring kits available.
